Learning Management System (LMS)

Counselling Process

Mode of Counselling :- Online

Brief describe the provision in LMS to be used by HEI :-

The HEI will use a secure, user-friendly and integrated Learning Management System (LMS) to deliver and manage online learning. The LMS will provide facilities for course content delivery, video lectures, e-books/e-resources, assignments, quizzes, discussion forums, learner interaction, attendance/progress tracking, assessment, feedback, and generation of learner performance reports. It will also support learner authentication, faculty access, continuous monitoring, data security, and academic record management.

Briefly write how the Learning Management System (LMS) will ensure the following: (provide a demo link, if available) :- --

Assessment mechanism	The LMS provides a structured and transparent assessment mechanism for each online course, comprising continuous/formative assessments such as online quizzes, assignments and tests, along with summative/end-semester examinations. Assessments are mapped with Course Learning Outcomes (CLOs), and the LMS facilitates secure submission, automated/manual evaluation, feedback, marks/grade management and performance analytics. The system maintains assessment records and audit trails to ensure transparency, academic integrity and compliance with applicable UGC requirements.
Identified technological interface and interoperability	The LMS provides a user-friendly and interoperable technological interface that supports seamless integration with academic, examination, authentication, communication and other institutional systems. It enables secure data exchange, single sign-on, integration with digital learning resources and compatibility with standard educational technologies and platforms.
Learner's Authentication Requirements	The LMS provides secure learner authentication through unique user credentials, including user ID and password, with appropriate identity verification and access controls. Each learner is provided individual and authenticated access to learning resources, assessments and examinations, ensuring data security, learner identification and academic integrity.
Learner Registration - through a web application	The LMS provides a secure web-based learner registration facility through which students can register online using their personal and academic details. The system validates the submitted information and generates unique login credentials, enabling seamless access to courses, learning resources, assessments and other academic services.
Active Engagement of the Learners along with Analytics for active engagement of learners and Reporting	The LMS enables active learner engagement through interactive learning activities, quizzes, assignments, discussion forums and digital learning resources. Built-in analytics track learner participation, login activity, content access, assessment performance and course progress. The system generates real-time reports to monitor learner engagement and identify learners requiring academic support or intervention.

Payment Gateway –using Digital Payment system	The LMS provides a secure digital payment gateway for online payment of admission fees, tuition fees and other applicable academic charges. It supports convenient and secure electronic payment modes and provides transaction confirmation and payment records for learners and the University.
Tracking the delivery of a Course or programme	The LMS enables systematic tracking of course and programme delivery through monitoring of content availability, learner participation, course progress, scheduled activities and assessment completion. It provides dashboards and reports to faculty and administrators for effective academic monitoring and timely corrective action.
Technical Know-how or Skills Requirements	The LMS is designed with a user-friendly interface requiring basic digital literacy for learners and faculty. Users can access courses, learning resources, assessments and communication tools using standard web browsers and internet-enabled devices. Training and technical support are provided to ensure effective use of the LMS.
